	Australia	
	B1/B3/B5/B7/B8/B28	
Dimensions	43x70x21mm	
Weight	55.2g	
Waterproof Level	IP67	
GPS Sensitivity	Tracking -165dBm	
	Re-acquisition	
	-163dBm	
	Acquisition -148dBm	
GPS Accuracy	<10m	
GPS Start Time	Cold start 36s	
	Warm start 22s	
	Hot start 1s	
Battery Capacity	1100mAH	
SIM Card Type	Nano Sim	
Firmware	OTA/USB	
Upgrade Mode		
Work time	Max 72hours	
Charging time	3-4hours	

3 Charging

Contact the charging interface by the magnetic USB cable.

4 Inserting a nano SIM card

Open the device with screwdriver, put SIM into card port in proper direction. Tighten the device to make sure it is waterproof.

Note: To avoid battery damage, ensure the SIM clot is closed before screwing back the device

5 Switching the device on and off Hold the power button for more than 3 seconds until tracker vibrates. This indicates on/off.

6 Set the authorized phone numbers
You can set 8 phone numbers at most
Send command 123456A1, authorized phone
number via SMS, the device replies: 1 TEL OK!
Authorized phone number.

Note: A1 means the first phone number, A2 means the second etc.. until A8

7 SOS Emergency Call

Hold SOS button until device vibrates. SOS alert will be triggered and will send message to phone numbers A1-A3 and call A1-A8

Note: If A1 misses the call, the device will automatically call the next until someone answers.

8 Making A Phone Call

Hold Call 1 button or (dial A4) or Call 2 button (dial A5) for 2 seconds, release when vibrates and the GSM or GPS indicators flash quickly. You can hand up the phone call by pressing SOS **Note**: To adjust the call volume, press Call 1 to turn it up and Call 2 to turn it down.

9 Answer the Phone Call

As default it will automatically answer after 4 rings. To change this send command 123456Q3,1 via SMS you can then pick up the call by pressing the function button and hang up with the SOS button

10 Listen-in Function

Send command 123456U1 via SIS, the device answers automatically and goes to listening in mode when you make a call to the device.

Note: The default setting is two-way audio (123456U0) Command of U1 and U0 cannot be used at the same time, you can send command 123456U1/123456U0 to switch it.

11 Fall Down Alert

Send command 123456KLXXX to set threshold, XXX is 3 digital number (000<xxx<255). 000 means to close the fall down alarm function and 255 means the most sensitive fall detection XXX is advised to be from 045 to 060. For example, send command 123456KL060 via SMS, the device will reply "Set Low G Threshold OK" then when fall down alert is triggered, the device will send a message to the first authorized phone number, then A2 etc.

12 Get the single positioning Send command 123456F via SIS. The device will search the GPS signal to get the latest location.

13 Connect to our tracking platform
(1)Set APN, IP and port. Send command
123456CAPN,IP:Port via SMS
(2)Send command 123456D to turn on
SPRS

(3)Send command 123456B to get the IMEI number, then share the IMEI number with us. We will offer you an account for logging into the platform www.glotracking.com/m

14 Reset the Device

Send command RESET! Via SMS, the device will reset to factory settings and restart.

Cautions

(1)Don't put in over heated or overcooled placed

(2)Handle carefully, do not shake or vibrate (3)Do not paint the unit

(4)Do not disassemble or refit the unit (5)Please use the battery and charger provided only
